## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 13 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Currently claim 13, depends from a cancelled claim 5. It is in the Examiner's opinion that the claim is intended to be depending from claim 12, and has been examined as being so.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory

double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 9-23 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/557,474. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are specific to that of the stepped reflector of the pending application and are not patentably distinct for one another.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 9, 12, 14, and 20-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 9 recites the limitations "the center axis, "the wavelength  $\lambda$ ", and "the sonic vibrations". There is insufficient antecedent basis for these limitations in the claim.

7. Claim 12 recites the limitations, "the wavelength", and "the sonic vibrations" in line 3 of the claim. There is insufficient antecedent basis for these limitations in the claim.
8. Claim 14 recites the limitation "the horizontal center axis" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.
9. Claim 20 recites the limitation "the horizontal center axis" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.
10. Claim 21 recites the limitation "the horizontal center axis" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.
11. Claim 22 recites the limitation "the horizontal center axis" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.
12. Claim 23 recites the limitation "the horizontal center axis" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.
